SWEDEN.

LIST OF ARTICLES THE EXPORT OF WHICH IS PROHIBITED.

October 1, 1915.

NOTES.

(1) A Swedish Royal Decree of the 9th January, 1915, definitively prohibited the *transit* through Sweden of arms, ammunition, and other war material. The articles to which this prohibition of transit applies are indicated by a cross (X) in the list printed below.

Under the rules at present enforced by the Swedish Government, the *transit* through Sweden of *all* goods on the Swedish export prohibition list is also prohibited. Since the 16th August, 1915, this prohibition of transit has been applied also to goods sent through Sweden by parcel post.

(2) As from the 22nd April, 1915, the export is prohibited of goods with regard to which no special prohibition of export has been enforced, but which are manufactured wholly or in part from materials of which the exportation is prohibited, if it appears from the quantity of the material employed or from some other circumstance that the working-up to which the material has been subjected is merely intended to facilitate the exportation of the prohibited materials of which the goods consist.

(3) The numbers and letters quoted below relate to the headings of the "Statistical Index of Goods" under which the prohibited articles fall.

The *numbers* are the same as those of the Swedish Customs Tariff*; the *letters* indicate the sub-divisions of the numbers, and are found only in the "Statistical Index"—which is considerably more detailed in classification than the Customs Tariff.

DENMARK.

LIST OF ARTICLES THE EXPORTATION OF WHICH IS PROHIBITED.

September 13, 1915.

NOTES.

1. As regards goods in transit and transshipment goods (in the Copenhagen free port and all other Danish harbours), all such goods, if of a kind prohibited to be exported from Denmark, are covered by the prohibition unless they are on a through bill of lading to a port in a foreign (non-Danish) country.

The prohibition is therefore applicable in cases where the goods are either shipped to a Danish port "to order," or where the goods are redestined to another port than the one originally mentioned in the bill of lading (unless it is only a question of redestination to another port in the same country).

(20928.)

2. According to an official notice published in the "Berlingske Tidende" of the 12th February, 1915, permissions to export granted by the Ministry of Justice are valid only for one month from the day on which permission was granted, unless other conditions are determined in the permit itself.
